**Product:** Recombinant Mouse MIP-1α (CCL3)

**Cat #: 300-333P**

**Powder**

### Description
Macrophage Inflammatory Protein-1 alpha (MIP-1α), also known as CCL3, is produced by macrophages and is thought to induce inflammatory responses, including superoxide production by neutrophils. MIP-1α can exist as a naturally occurring heterodimer with MIP-1β and has been shown to have antiviral activity against HSV-1. Alternate names: CCL3, LD78α

### MW
Non-glycosylated protein, containing 69 amino acids, with a molecular weight of 7.8 kDa.

### Physical Appearance
Sterile filtered white lyophilized (freeze-dried) powder.

### Source
*E. coli*

### Formulation
Recombinant mouse MIP-1α is lyophilized with no additives.

### Reconstitution
Centrifuge vial before opening. When reconstituting the product, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. It is recommended to reconstitute the lyophilized product with sterile water at a concentration of 0.1 mg/mL, which can be further diluted into other aqueous solutions.

### Stability
Lyophilized product is very stable at -20°C. Reconstituted material should be aliquotted and frozen at -20°C. It is recommended that a carrier protein (0.1% HSA or BSA) is added for long term storage.

### Biological Activity
The activity is determined by the ability to chemoattract human PBMCs at 1-10 ng/mL.

### Endotoxin Level
Measured by kinetic LAL analysis and is typically ≤ 1 EU/μg protein.

### AA Sequence
APYGADTPTA CCFSYSRKIP RQFIIVDFET SSLCSQPGVI FLTKRNQIC ADSKETWVQE YITDLELNA

Purity greater than 95% determined by HPLC, Reducing and Non-reducing SDS-PAGE, UV spectroscopy at 280 nm.

Protein content determined by HPLC, Reducing and Non-reducing SDS-PAGE, UV spectroscopy at 280 nm.
