Results shown were obtained by carefully performed methods believed to be reliable. However, since some results may vary for specific tests depending upon methodology and other variables, it is suggested that tests for which results are particularly important be repeated by the user of this product.

All human plasma is collected from stringently screened donors at FDA-licensed collection centers in the United States. All donors are tested and found to be negative for Indirect Antiglobulin.

These products are intended for research or the manufacturing of non-injectable products only. Not for use in humans, clinical diagnosis, or products subject to license under Section 351 of The Public Health Safety Act.
