

Continuum™ Transfection Reagent

Exceptional performance at an unmatched value

NIH 3T3 eGFP Fluorescence Intensity

NIH 3T3 FACS Analysis

Why Continuum™?

- **Efficiency**—incredible efficiency with half the amount required by competitors' products, even in hard-to-transfect cell lines
- **Versatility**—cell lines, primary cells, DNA and siRNA co-transfection
- **Gentleness**—lower toxicity resulting in higher cell survival
- **Simplicity**—a remarkably straightforward and streamlined protocol that will save you both time and money
- **Origin**—100% animal-free origin
- **Affordability**—lower priced than competing products

Catalog Number	Product	Size	Price
400-700	Continuum™ Transfection Reagent	50 µl	\$60
		0.75 ml	\$259
		1.5 ml	\$450
